Idaho North Resources signs lease on the Klondike North gold/silver property, Esmeralda County, Nevada

Idaho North Resources is pleased to announce that it has signed a lease agreement with Mountain Gold Claims LLC for the Klondike North gold/silver property in Esmeralda County, Nevada. The property is just south of the city of Tonopah, Nevada and consists of 12 unpatented claims contained in 240 acres. At the property, numerous prospects, adits and mine shafts have explored the mineralization. The main mineralized area was subject to limited mining and heap leach effort in the mid to late 1980's.

In 2008, a total of \$463,000 was spent by the former lessee, AuEx/Eldorado Gold on the project. This included limited drilling over a small portion of the targets identified on the property. Twelve reverse circulation drill holes for an average depth of 500 feet and for a total of 8,420 feet were completed. Out of the 12 drill holes, 9 holes intersected anomalous gold-silver mineralization while one drill hole intercepted 5 feet of 1.37 opt gold and 11ppm silver. The sediment hosted targets, northwest pediment targets and adjacent ground to the high-grade (1.37 opt gold drill hole intercept) remain untested. A ground magnetic survey was recently completed, adding several new targets for evaluation.

Neighboring deposits are the Tonopah District (2 million oz. gold and 175 million oz. silver (mainly in veins and stockwork), Hasbrouck District (400,000 oz. Gold (mainly in sinters, veins and stockwork), Three Hills deposit (300,000 oz. gold (mainly in stockwork) and the Divide District (250,000 oz. gold-silver in stockwork and replacement) and Goldfields deposits (4 million oz. gold). All of the above districts and deposits are hosted in Tertiary volcanic rocks and basement sediments.

Other mining companies active in the area are Tonogold Resources Inc. (PINK OTC: TNGL) and Centerra Gold Inc. (TSX: CG) which control the nearby Tonopah Divide gold project and Allied Nevada Gold Corp. (NYSE AMEX: ANV) which controls the Hasbrouck gold project. Allied allocated \$10 million for exploration on the Hasbrouck in 2011. Both projects are located five miles south of the town of Tonopah, Nevada and are next to Idaho North Resource's claims.

About Idaho North Resources

Idaho North Resources is a U.S. based junior mining company involved in exploring for and developing gold, silver and base metal resources in Idaho and Nevada. The Company has a portfolio of silver/gold mineral properties near Tonopah, in Esmeralda county, Nevada, and a gold/silver property south of Fallon, in Mineral county, Nevada. The Company's stock is privately held and does not currently trade on any public market or exchange.
