Idaho North Resources Updates Shareholders on its Eagleville Gold-Silver Project, Mineral County, Nevada

Idaho North Resources (IDAH) project of current focus is the Eagleville Property located approximately 55 miles southeast of Fallon, NV, in Mineral County, Nevada, adjacent to the Rawhide gold-silver deposit. The Eagleville Project consists of 72 unpatented mining claims situated in the eastern portion of the Rawhide Mining District along the northeastern main bounding structure of the Walker Lane Structural Belt.

The property covers a widespread area of vein mineralization associated with a mesothermal, gold-silver-barite system hosted in metavolcanic and metasediment of the Excelsior Formation. The precious metal mineralization is localized by several felsic to mafic, intrusive dike, sill and stock phases. Numerous historic mine workings have explored and produced high-grade gold and silver from at least five separate, en echelon quartz veins. All core and reverse circulation drill holes have intercepted anomalous to ore-grade gold mineralization. Recent review of the past drilling has also identified broad areas of low-grade gold and silver mineralization presenting bulk tonnage, disseminated, open pit targets.

Idaho North Resources President and CEO Mark Fralich comments, “The Company is currently designing a drill program to develop a near-term, underground, minable deposit along the Golden Gate Vein Zone. We are excited to advance Eagleville towards a producing project.” Drilling will target the shallow mineralization identified in the underground sampling with assays up to 3.05 opt. gold and 29.9 opt silver. In addition to drilling the vein zones, Idaho North Resources will explore the numerous, high-grade gold and silver, surface rock chip samples assaying between 0.5 to 1.71 opt gold and 17.3 to 68.8 opt silver. Idaho

North Resources corporate strategy is to advance the Eagleville Property to an underground gold-silver producing project, as well as discovering a world-class, open pit precious metal deposit on the property.
