

PRESS RELEASE

8-20-2013

Idaho North Resources receives clearance to list on the OTC/BB market under the symbol “IDAH”

Idaho North Resources is pleased to announce that it has received clearance from FINRA to list on the OTC Bulletin Board with the symbol IDAH. The company will also be shown on the OTC Link “Pink Sheets” as an OTC/QB stock, a reporting issuer with the Securities and Exchange Commission.

On March 22, 2013, an S-1 Registration Statement filed by Idaho North Resources became effective. Due to the “shell company” rule as defined by the SEC, the S-1 was a critical step in allowing “registered free-trading shares” into the public market upon listing the company. On April 1, 2013, the company filed a Form 8-K with the SEC declaring that Idaho North Resources is no longer a “shell company” as defined in Rule 405 of the Securities Act of 1933. The 8-K will have special significance for prospective investors when raising capital in the future.

Exploration work will continue on the company’s Eagleville gold/silver project south of Fallon, Nevada and it’s Klondike North silver/gold project near Tonopah, Nevada. Work will include soil sampling, rock sampling, geological mapping and compilation of additional data from previous exploration programs. A substantial amount of data has been generated from both projects over the years from past production and exploration programs of former lessees.

About Idaho North Resources

Idaho North Resources is a U.S. based junior mining company listed on the OTC/BB market under the symbol IDAH and is involved in exploring for and developing gold, silver and base metal resources in Idaho and Nevada. The company currently has long-term lease options on it’s Eagleville gold/silver project south of Fallon, Nevada and it’s Klondike North and Divide silver/gold projects near Tonopah, in Esmeralda county, Nevada.
